

CAM SOPER

Developer Educator · Open-Source Advocate · Technical Storyteller

cam.soper@outlook.com[linkedin.com/in/camthegeek](https://www.linkedin.com/in/camthegeek)github.com/camsopercamsoper.github.io

Developer educator, open-source advocate, and technical storyteller with deep expertise in architecting scalable, developer-friendly solutions. Passionate about making complex technical topics accessible through engaging content, clear documentation, and community-driven learning. Rapidly adapts to emerging technologies, bridging the gap between innovation and practical application, and comfortable designing and guiding technical strategies that empower developers while ensuring sustainable, scalable systems.

Key Skills

- **Developer Advocacy & Education** — creating learning experiences that inspire and empower developers.
- **Solution Architecture & Technical Strategy** — scalable, developer-friendly solutions aligned to product vision and technical goals.
- **Polyglot Mindset & Technology Adaptability** — quickly ramping up on new languages by leveraging fundamentals over syntax.
- **Cloud & Infrastructure Expertise** — deep knowledge of Azure, .NET, DevOps, containers, and scalable architectures.
- **Open Source & Community Building** — driving developer engagement, fostering contributions, and supporting mentorship.
- **AI & Content Automation** — leveraging AI-driven tools to optimize documentation workflows and learning materials.
- **Technical Storytelling & Communication** — translating complex concepts into accessible resources via documentation, video, and live events.

Work Experience

Senior Content Developer

Microsoft · Remote — Jun 2015 - May 2025

Focused on developer education, open-source contributions, and making complex technical topics more accessible. Crafted high-impact learning materials across a variety of media to empower developers.

- Managed and maintained a comprehensive ecosystem of **467 Azure and .NET documentation and training topics**, driving over **1.1 million annual pageviews** and ensuring developer accessibility at scale.
- Authored technical documentation for **Azure PaaS products, Azure DevOps, Azure SDK, and .NET**.
- Collaborated with the .NET community team to create instructional video series, “Let’s Learn” events, content for Microsoft conferences, and other learning initiatives.
- Co-founded and co-hosted **On .NET Live** — a community-driven stream supporting .NET developers.
- Primary author of .NET training content on Microsoft Learn, including .NET fundamentals, ASP.NET Core, .NET microservices, and Azure SDKs.
- Edited and maintained vendor-created training modules for **.NET Aspire**.
- Designed and implemented **AI-driven documentation tooling**, integrating GitHub Copilot to streamline workflows and enhance content automation.
- Built developer environments using **Dev Containers, Codespaces, and WSL**, streamlining onboarding for Linux-first and cross-platform developers.
- Wrote the entire set of **.NET IoT documentation**, bridging hardware integration with .NET development.
- Advocated for open-source learning, ensuring training materials, samples, and docs remained accessible for community contributions.

Premier Field Engineer

Microsoft · Various Locations, Remote — *Feb 2012 – Jun 2015*

Worked with development teams across industries to solve production issues, optimize performance, and deliver hands-on training focused on .NET and Azure. Supported federal agencies and Fortune 500 companies with deep technical troubleshooting and developer education.

- Consulted on **mission-critical .NET and Azure systems**, diagnosing scalability challenges, optimizing performance, and guiding enterprise architecture decisions across public-sector and Fortune 500 clients.
- Developed and led enterprise-focused workshops, designing scalable technical curricula tailored to Fortune 500 and government-agency needs.
- Launched Microsoft’s **first fully online Premier workshops**, proving virtual technical education could match in-person effectiveness.
- Worked with notable customers including the White House Communication Agency, US Air Force, US Government Printing Office, Orange County (CA), and Toshiba of America.
